

# Utility → Liquidity → Yield.

FUZE.ac turns any tokens into a revenue-sharing, CEX-ready asset—faster than you can say “token utility”.

# Market Pain (2025)

- 60 % of new CEX listings =  $\geq 70\%$  bot volume.
- 90 % of unlock cliffs dump  $\geq 10\%$ ; team cliffs – 25 % sector median.
- Exchanges purge low-volume pairs monthly; founders get 14-day notices.
- Investors prefer real-yield tokens (+42 % vs inflation peers).

## FUZE Triple-Engine Solution

# Triple Engine: PlayHub Utility, AI Liquidity, KPI- Guarded OTC — one closed loop of token health

PlayHub drives real usage, AI MM keeps spreads  $\leq 2\%$ , and KPI-bonded OTC secures capital; net effect: unlock dumps capped at  $-5\%$  while CEX volume climbs  $+35\%$ .

### Play Hub

What It Does: Token-fuel mini-games in  $< 60$  s

KPI Impact:  $+28\%$  transfers /  $+35\%$  CEX vol

### Decision Optimization

What It Does: RL bots,  $\leq 2\%$  spreads, Merkle proof

KPI Impact:  $93\%$  KPI hours in-spec

### OTC Engine

What It Does: KPI-bonded fundraising, unlock defence

KPI Impact: Cliff draw-down  $-5\%$  vs  $-20\%$  sector

PlayHub – Instant Utility

# Turn idle tokens into game-fuel driving volume, revenue, loyalty

## Plug-And-Play

Plug any token into our  
Web3-ready games.

## Rake Split

80 % winners • 17 % project  
treasury • 3 % FUZE staker vault.

## Pilot Boost

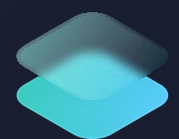

Pilot tokens: +30 % user retention,  
\$0.09 ARPU.

AI-Powered Market-Making

RL-driven bots keep spreads tight,  
react in milliseconds, and prove every  
quote on-chain hourly

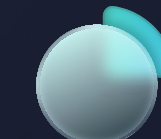

#### Low-Latency Core

Rust-WASM core; 25-50 ms p99  
latency.

#### Auto Modes

15+ scenario modes; auto  
Volume-Boost / Spread-Clamp.

#### Merkle Proof

Hourly liquidity Merkle roots on  
Arbitrum Nova.

OTC Deal Engine & Compliance

# Raise capital safely, sync unlocks with bots, and breeze through CEX compliance fast

## KPI Bonds

UMA-oracle KPI bonds—investors vest on milestones.

## Unlock Sync

Pre/Post-Unlock MM sync reduces dump risk.

## Fast Compliance

KPI Engine clears delist flags in < 2 h (vs 72 h manual).

## Business Model & Tokenomics

100 % of US\$2–10 M quarterly profit goes to FUZE stakers—zero inflation, 6–20 % APY.

US\$2–10 M

/quarter profit pool from PlayHub rake (3 %), MM retainers, OTC fees, SaaS APIs.

100%

Net profit → FUZE stakers in StableCoin each quarter.

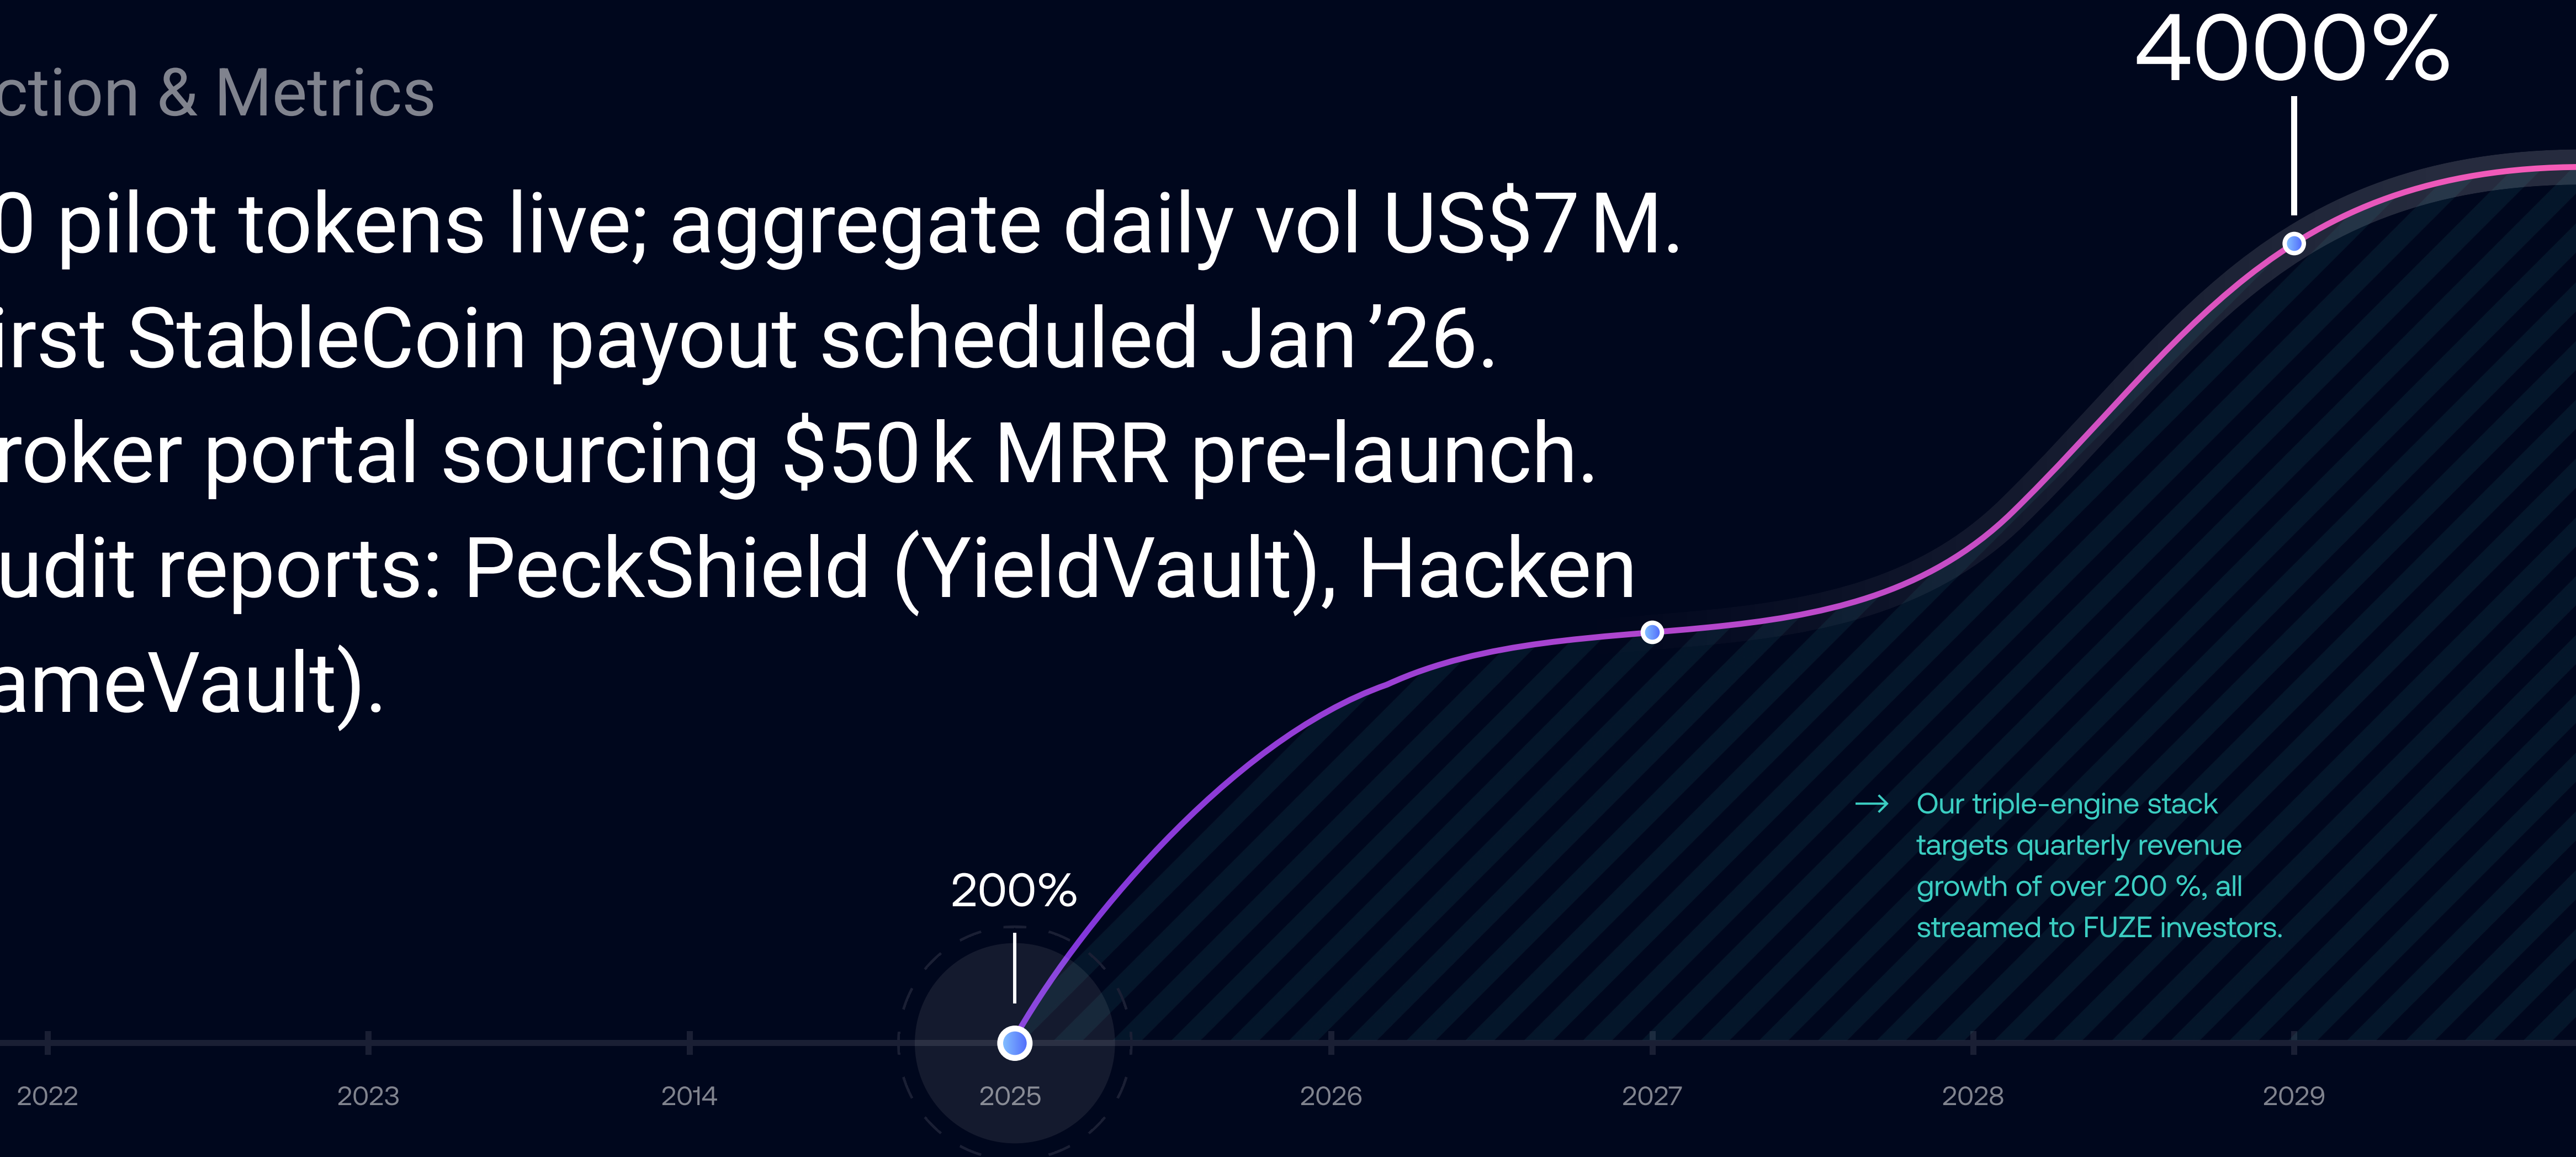

500M

Fixed supply, zero inflation; projected APY 6-20 %.

## Traction & Metrics

- 10 pilot tokens live; aggregate daily vol US\$7 M.
- First StableCoin payout scheduled Jan '26.
- Broker portal sourcing \$50 k MRR pre-launch.
- Audit reports: PeckShield (YieldVault), Hacken (GameVault).

## Roadmap Highlights

# Build → Profit → DAO – Timeline

-  **Q3 '25** — Alpha: AI MM v1, PlayHub SDK, 10 pilots.
-  **Q4 '25** — Public Beta: Real-Yield Vault, ≥10 exchanges.
-  **Q1 '26** — Income Portal, US\$2 M/Q profit goal.
-  **Q4 '26** — DAO-Lite control of treasury & adapters.

## Team & Ask

- Core: Chawalit Rugsasri – ex– Nakamoto Games CEO, ex-Outlanders Venture Lead, Solidity lead.
- Raising US\$3.1 M (Seed+Private rounds 22 % supply).

Looking for:

- Strategic CEX partners.
- Game studios to integrate PlayHub.
- Funds seeking StableCoin yield on real fees.
